

ASTROBIOLOGY

EXAM #1

Astronomy 310: *Astrobiology*
Prof. Welsh

Spring 2012
Friday, 2012 March 2

INSTRUCTIONS:

Completely fill out the ParSCORE Enrollment scantron form. Be sure to include your Red ID on the back as well as the front, and don't add a leading zero to your Red ID – leave the 10th block blank. Leave the phone number and 'code' part blank. On the back, fill in 'Test Form A' and exam # 001.
You will lose 1 point for each error on the form!

Use a #2 pencil only. Darken completely, and erase thoroughly if you change your answer. Be careful not to darken two answers.

There are 50 questions. Choose the **best** answer — the questions are not designed to be tricky. You may leave anytime you are finished, but please be considerate and be quiet if you finish early.

If you are confused by any question on the exam, please raise your hand to get help. It is too late to ask for clarification after you hand in your scantron.

** You may keep your exams to help you study for the final. **
But if you don't want your exam, drop it off and I will recycle it.

Good luck!
